

FIRE & RESCUE

Fire & Rescue Reciprocating Saw Blades

When lives are on the line, only the best will do. These are the blades preferred by professional firefighters who know they can count on Morse. Fire and Rescue recip blades from M. K. Morse are bimetal with a long lasting cutting edge and are thicker than most blades to prevent bending and pinching. The wavy tooth set means the blades can cut more smoothly through a variety of materials without binding and still cut quickly.

ADVANTAGES

-  **Wavy Set Reduces Pinching During Cuts**
-  **.062" Blade Thickness for Little or No Bending**
-  **Available in 6", 9", and 12" Lengths**

Metal Devil® Metal Cutting Saws & Blades

Morse Metal Devil metal cutting circular saws offer fast, clean cutting of door posts, hoods and trunks for vehicle extraction without the need of hydraulic hoses. They've even been shown to be able to open the roof of a van in fifteen seconds. They also provide a quick, portable solution for entry points through security bars or roll-up doors.

AT-A-GLANCE

-  **7 & 9 Inch Portable Saws Available**
-  **AC and DC Capability**

APPLICATIONS

-  **Vehicle Extraction**
-  **A, B and C Automotive Posts**
-  **Burglar Bars in Windows**
-  **Roll-up Doors**
-  **Forcible Entry Scenarios**
